BWANA TUMBO NOT SO GREAT.

Correspondence from Nairobi, British East Africa, seeks to cast a doubt upon the magnitude of the achievements of Bwana Tumbo. It intimates very broadly that the exploits so graphically related were very ordinary incidents, viewed from the East African standpoint, and their credulous acceptance at face value by Americans "a bloomin' good joke on the Yankees, don'cher know.' For instance, as to the lion being lord and his reign being cruel:

"East Africans do not look with a great deal of interest upon the mere slaying of lions and such small fry. They do not even use this sort of thing as a topic of conversation when the weather shows any interesting

Then it is asserted that "the inventive genius of the pseudo-scientists have risen to such frenzied heights in supplying the Smithsonian institution with creatures never found on land or sea," including the kirkakdik, the kirumbo bird and our old friend the gyastacus.

Nairobi concludes with the advice United States of any rumor of anything novel and unknown in the way of birds or beasts a safe plan would be to search for an affidavit attach- man that's too dern lazy to gut the

ed to the pelt. This intimation of nature-faking will bring joy to the heart of Dr. Long. If true, the fact that the nature fakers have faked the original denouncer of nature fakes would be a terrible retribution. But Nairobi is too enthusiastic, too eager in its desire to belittle our Nimrod. It seems much more plausible that this correspondence emanates from some en vious British East African sport who has fallen prey to the green-eyed monster. Or possibly, and this is to be seriously considered, it owes its

origin to the machinations of some,

malefactor of wealth, who thus seeks to Pearyize the ex-president.

NICARAGUA AND J. P. MORGAN.

Ex-President Zelaya, of Nicaragua, has issued a manifesto, in which he declared that his surrender of the presidency was caused by his desire to save Nicaragua the humiliation of outrages by this country.

He charges that the United States seized upon the execution of Cannon and Groce, whom he declares were put to death lawfully, as a pretext for intervention.

Without in the least degree defending Zelaya, or investing him with a martyr's halo, it may be said that he has some good ground for complaint. It does not appear from anything thus far given publicity that this government is justified in the cause it has taken with regard to Nicaragua.

It is said, with the developments thus far corroborating the statement, that the real motive behind the new Latin-American policy of the Taft administration 's to "carry the flag to the big ditch." It will be remembered that in his message to congress the president intimated that the Monroe doctrine is passe.

American financiers see in Central America great opportunities for aggrandizement if their interests are backed up by American bayonets. The banking house of J. P. Morgan & Co. has taken over the national debt of Honduras. The same firm is now fiscal agent for the republic of Santo Domingo by virtue of an authority which Theodore Roosevelt did not possess, but chose to exert.

J. P. Morgan is no less a "guide, counsellor and friend" of the Taft administration than of the previous marriage solemnized in St. Louis was one. And it is aparent that this great received by the Democrat-Sentinel financier, to whose beck and nod today: presidents and cabinets respond with News Department alacrity, has a greedy eye set upon Milner Compton married Christmas the Central American republics.

may well restrain any jingoistic ten. N. L. Mexico.' dencies that may possess them at the present moment and watch J. P. Morgan.

Two of the recent appointments of President Taft are not such as to inspire or increase public confidence in his administration. Richard Kerens has been named as ambassador to Austria-Hungary, and Robert Bacon has been nominated for ambassador to France. Mr. Kerens is a machine politician from Missouri: a repeatedly unsuccessful aspirant for a senatorial toga, and a very heavy contributor to the republican campaign fund last year. Mr. Bacon is a former partner of J. P. Morgan. He was made an assistant in the state department by Theodore Roosevelt, and it is apparently to get rid of him that Mr. Taft provides a place for him in Paris. The prestige of the United States abroad will not be increased by these appointments, while in the pepular mind at home they represent the same political system that Cannon and Aldrich are creatures of. In their appointment President Taft has added another to the long list of blunders achieved by him since he took the reins of government.

PROTECTS IMIMGRANTS

Italian Officials Much Pleased With

Rome, Dec. 29.—Italian officials are much pleased by the report of the American immigration commission, in which steamships floating the flag of Italy were given a clean bill of health.

This superiority is due to the law known as the royal commissioner act. These royal commissioners are surgeons assigned by the government to duty on the immigrant ships of the Italian lines, and the report of the American commissioner presents a grateful testimony to the excellent service found on the Italian ships in consequence of the intelligent care exercised by these commissioners.

The Italian law even gives the commissioner authority over the captain.

Some folks have tried so long to find relief from Indigestion and Dyspepsia or an out-of-order stomach with the common every-day cures ad vertised that they have about made up their minds that they have somethings else wrong, or believe theirs is a case of Nervousness, Gastritis, Ca-

nauseous odors. A hearty appetite, with thorough digestion, and without the slighest discomfort or misery of the Stomach is waiting for you as soon as you decide to try Pape's Diapepsin.
